

## What's It All About?

The aim of the course is to demonstrate to delegates from secondary schools how a mastery mathematics curriculum is delivered.

This interactive day will bring together many of the questions that are currently being asked around the Shanghai and Singapore mastery strategy — fluency, reasoning, problem solving, collaboration and pre-learning.

### Dates

11th July 2016

9.30am—3pm

### Cost

£60
