

Unit Overview and Guidance

- The exemplification has been taken from the NCETM online 'Resource Toolkit', with additions in order to ensure full coverage.
- Links to the White Rose Maths hubs schemes of work (with questions categorised into the three aims of the national curriculum i.e. fluency, problem solving and reasoning) are hyperlinked to each of the objectives. Many thanks go to the White Rose Maths hub for permission to include their resources.
- The NCETM reasoning questions have also been incorporated into each unit and are identified in pale purple boxes underneath the group of the most relevant objectives.
- The 'big Ideas' sections from the NCETM 'Teaching for Mastery' documents have been included at the start of each unit. Hyperlinks to the full NCETM 'Teaching for Mastery' documents have also been included for easy reference.
- Hyperlinks to NRich activities have also been added to this version. These are found by clicking on the blue buttons like this one 1 at the bottom of relevant objective.
- Some additional content has been added in order to support mixed-aged planning. Any additional content is in *italics*. Occasionally ~~strikethrough~~ has been used to identify when an objective has been altered and this is primarily where an objective has been split between two units.
- Each unit is sub-divided into sections for ease of planning. Sub-categories in this unit are;
 1. Recognising and Finding Fractions
 2. Decimals
 3. Finding and Using Equivalence
 4. Calculating with Fractions, Decimals and Percentages
 5. Solving Problems

	Yr 3	Yr 4	Yr 5	Yr 6
NCETM Teaching for Mastery Questions, tasks and activities to support assessment	<p>The Big Ideas</p> <p>Fractions are equal parts of a whole.</p> <p>Equal parts of shapes do not need to be congruent but need to be equal in area.</p> <p>Decimal fractions are linked to other fractions.</p> <p>The number line is a useful representation that helps children to think about fractions as numbers.</p>	<p>The Big Ideas</p> <p>Fractions arise from solving problems, where the answer lies between two whole numbers.</p> <p>Fractions express a relationship between a whole and equal parts of a whole. Children should recognise this and speak in full sentences when answering a question involving fractions. For example, in response to the question 'What fraction of the chocolate bar is shaded?' the pupil might say 'Two sevenths of the whole chocolate bar is shaded.'</p> <p>Equivalency in relation to fractions is important. Fractions that look very different in their symbolic notation can mean the same thing.</p>	<p>The Big Ideas</p> <p>Representations that may appear different sometimes have similar underlying ideas. For example 1/4, 0.25 and 25% are used in different contexts but are all connected to the same idea.</p>	<p>The Big Ideas</p> <p>Fractions express a relationship between a whole and equal parts of a whole. Pupils should recognise this and speak in full sentences when answering a question involving fractions. For example, in response to the question 'What fraction of the journey has Tom travelled?' the pupil might respond, 'Tom has travelled two thirds of the whole journey.'</p> <p>Equivalent fractions are connected to the idea of ratio: keeping the numerator and denominator of a fraction in the same proportion creates an equivalent fraction.</p> <p>Putting fractions in place on the number lines helps understand fractions as numbers in their own right.</p> <p>The Big Ideas (Ratio and Proportion)</p> <p>It is important to distinguish between situations with an additive change or a multiplicative change (which involves ratio). For example, if four children have six sandwiches to share and two more children join them, although two more children have been added, the number of sandwiches then needed for everyone to still get the same amount is calculated multiplicatively.</p>

NUMBER: Fractions, Decimals and Percentages (NFD - 7 weeks)

Strand	Yr3	Yr4	Yr5	Yr6
Recognising and Finding Fractions	<p>unit fractions and non-unit fractions with small denominators</p> <p>Unit and non-unit fractions</p> <p>Tenths</p> <p>Unit Fractions. Unit means one. Here are some examples of unit fractions.</p>  <p>Non-unit fractions. Unit means one, so non-unit is any number apart from one. Here are some examples of non-unit fractions.</p>  <p>Many (or, rather, more than one of the) parts, of an equally divided whole, is a non-unit fraction.</p> <p>What fraction of this shape is shaded? How do you know?</p> 	<p><i>(Year 3 objective) unit fractions and non-unit fractions with small denominators</i></p> <p>Year 4 What is a fraction?</p>	<p>recognise mixed numbers and improper fractions and convert from one form to the other. Write mathematical statements >1 as a mixed number</p> <p>Improper to mixed numbers</p> <p>Mixed numbers to improper</p> <p>Count in fractions</p> <p>(e.g. $\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1\frac{1}{5}$)</p> <p>How many halves in: $1\frac{1}{2}$ $3\frac{1}{2}$ $9\frac{1}{2}$...?</p> <p>How many quarters in $1\frac{1}{4}$ $2\frac{1}{4}$ $5\frac{1}{4}$?</p>	<p><i>(Year 5 objective) recognise mixed numbers and improper fractions and convert from one form to the other</i></p> <p>$\frac{10}{7} + \frac{13}{7} = 3\frac{2}{7}$ leading to:</p> <p>$\frac{7}{5} + \frac{5}{3} = 3\frac{1}{15}$</p>
	<p>recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators</p> <p>Count in tenths</p> <p>Fractions on a number line</p> <p>Position fractions on a number line; eg. mark fractions such as $\frac{1}{2}$, $3\frac{1}{2}$ and $2\frac{3}{10}$ on a number line marked from zero to 5.</p> <p>A fraction of each shape is shaded. Match each fraction to the correct place on the number line. One has been done for you.</p> 	<p><i>(Year 3 objective) recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators</i></p> <p>Year 4 Fractions greater than 1</p> <p>Year 4 Count in fractions</p>		

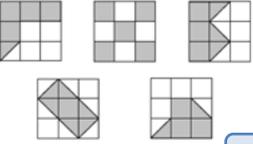

NUMBER: Fractions, Decimals and Percentages (NFD - 7 weeks)

Recognising and Finding Fractions	Find fractions of amounts	recognise, find and write fractions of a discrete set of objects: Fractions of an amount (1) Fractions of an amount (2) Fractions of an amount (3) Is there another way that you can describe the fraction? <ul style="list-style-type: none"> One fifth of 60kg Two fifths of 50 litres 	(Year 3 objective) recognise, find and write fractions of a discrete set of objects: Year 4 Fractions of a quantity Year 4 Calculate quantities	(Year 3 objective) recognise and use fractions as numbers: Year 5 Fraction of an amount Year 5 Fractions as operators	(Year 3 objective) recognise, find and write fractions of a discrete set of objects Year 6 Fraction of an amount Year 6 Finding the whole
	NCETM Reasoning	What comes next? 6/10, 7/10, 8/10,, 12/10, 11/10,,, True or false? 2/10 of 20cm = 2cm 4/10 of 40cm = 4cm 3/5 of 20cm = 12cm Give an example of a fraction that is less than a half. Now another example that no one else will think of. Explain how you know the fraction is less than a half (draw an image) Put in Order Ben put these fractions in order starting with the smallest. Are they in the correct order? One fifth, one seventh, one sixth What do you notice? 1/10 of 10 = 1 2/10 of 10 = 2 3/10 of 10 = 3 Continue the pattern. What do you notice? What about 1/10 of 20? Use this to work out 2/10 of 20, etc What do you notice? Find 2/5 of 10. Find 4/10 of 10. What do you notice? Can you write any other similar statements?	What comes next? 83/100, 82/100, 81/100,,, 31/100, 41/100, 51/100,, What do you notice? 1/10 of 100 = 10 1/100 of 100 = 1 2/10 of 100 = 20 2/100 of 100 = 2 How can you use this to work out 6/10 of 200? 6/100 of 200? True or false? 1/20 of a metre = 20cm 4/100 of 2 metres = 40cm Give an example of a fraction that is more than a half but less than a whole. Now another example that no one else will think of. Explain how you know the fraction is more than a half but less than a whole. (draw an image) What do you notice? Find 4/6 of 24 Find 2/3 of 24 What do you notice? Can you write any other similar statements?	Give an example of a fraction that is more than three quarters. Now another example that no one else will think of. Explain how you know the fraction is more than three quarters. What do you notice? Find 30/100 of 200 Find 3/10 of 200 What do you notice? Can you write any other similar statements?	Spot the mistake Identify and explain mistakes when counting in more complex fractional steps What do you notice? One thousandth of my money is 31p. How much do I have? What do you notice? 8/5 of 25 = 40 5/4 of 16 = 20 7/6 of 36 = 42 Can you write similar statements?

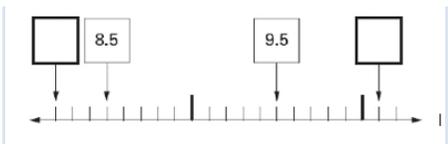

NUMBER: Fractions, Decimals and Percentages (NFD - 7 weeks)

Decimals	Counting	count up and down in tenths	count up and down in hundredths Continue the count 1.91, 1.92, 1.93, 1.94 ...	(Year 4 objective) count up and down in hundredths Year 5 Decimal sequences	
	Compare and Order Decimals		compare numbers with the same number of decimal places up to two decimal places Tenths on a number line Compare decimals Order decimals Place these decimals on a line from 0 to 2: 0.3, 0.1, 0.9, 0.5, 1.2, 1.9 Which is lighter: 3.5kg or 5.5kg? 3.72kg or 3.27kg? Which is less: £4.50 or £4.05? Put in order, largest/smallest first: 6.2, 5.7, 4.5, 7.6, 5.2, 99, 1.99, 1.2, 2.1 How many pence is £5.98, £5.60, £7.06, £4.00? Write the total of ten £1 coins and seven 1p coins (£10.07) Write centimetres in metres. For example, write: 125 cm in metres (1.25 metres)	read, write, order and compare numbers with up to three decimal places Order and compare decimals Write these numbers in order of size, starting with the smallest. 1.01, 1.001, 1.101, 0.11 Put the correct symbol, < or >, in each box. 3.03 <input type="checkbox"/> 3.3 0.37 <input type="checkbox"/> 0.327 Order these numbers: 0.27 0.207 0.027 2.07 2.7	
	NCETM Reasoning	Spot the mistake six tenths, seven tenths, eight tenths, nine tenths, eleven tenths ... and correct it.	Spot the mistake sixty tenths, seventy tenths, eighty tenths, ninety tenths, twenty tenths ... and correct it. Missing symbol Put the correct symbol < or > in each box 3.03 <input type="checkbox"/> 3.33 0.37 <input type="checkbox"/> 0.32 What needs to be added to 3.23 to give 3.53? What needs to be added to 3.16 to give 3.2?	Spot the mistake 0.088, 0.089, 1.0 What comes next? 1.173, 1.183, 1.193 What do you notice? One tenth of £41, One hundredth of £41, One thousandth of £41 Continue the pattern. What do you notice? 0.085 + 0.015 = 0.1 0.075 + 0.025 = 0.1 0.065 + 0.035 = 0.1 Continue the pattern for the next five number sentences. True or false? 0.1 of a kilometre is 1m. 0.2 of 2 kilometres is 2m. 0.3 of 3 Kilometres is 3m 0.25 of 3m is 500cm. 2/5 of £2 is 20p Missing symbol Put the correct symbol < or > in each box 4.627 <input type="checkbox"/> 4.06 12.317 <input type="checkbox"/> 12.31	

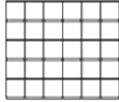

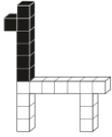

NUMBER: Fractions, Decimals and Percentages (NFD - 7 weeks)

Finding and Using Equivalence	Equivalent Fractions	<p>recognise and show, using diagrams, equivalent fractions with small denominators</p> <p>Equivalent fractions (1)</p> <p>Equivalent fractions (2)</p> <p>Equivalent fractions (3)</p> <p>Children should be able to:</p> <ul style="list-style-type: none"> Identify pairs of fractions that total 1. Circle two fractions that have the same value 	<p>recognise and show, using diagrams, families of common equivalent fractions</p> <p>Equivalent fractions (1)</p> <p>Equivalent fractions (2)</p> <p>Recognise that five tenths ($\frac{5}{10}$) or one half of this diagram is shaded.</p>  <p>Recognise that two eighths ($\frac{2}{8}$) or one quarter ($\frac{1}{4}$) of the set of buttons is ringed</p>  <p>Recognise that one whole is equivalent to two halves, three thirds, four quarters...</p> <p>For example, build a fraction 'wall' using a computer program and then estimate parts.</p> <p>Recognise patterns in equivalent fractions -</p> <p>$\frac{1}{2} = \frac{2}{4} = \frac{3}{6} = \frac{4}{8} = \frac{5}{10}$ and similar patterns for -</p> <p>$\frac{1}{3}, \frac{1}{4}, \frac{1}{5}, \frac{1}{6}, \frac{1}{10}$</p> <p>Here are five diagrams. Look at each one. Put a tick (✓ □) on the diagram is exactly $\frac{1}{2}$ of it is shaded. Put a cross (✗) if it is not.</p>  <div style="display: flex; gap: 5px;"> <div style="border: 1px solid black; border-radius: 50%; width: 20px; height: 20px; display: flex; align-items: center; justify-content: center;">1</div> <div style="border: 1px solid black; border-radius: 50%; width: 20px; height: 20px; display: flex; align-items: center; justify-content: center;">2</div> <div style="border: 1px solid black; border-radius: 50%; width: 20px; height: 20px; display: flex; align-items: center; justify-content: center;">3</div> </div>	<p>identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths</p> <p>Equivalent fractions</p> <p>Circle the equivalent fractions:</p> <p>$\frac{7}{100}$ $\frac{100}{7}$ $\frac{2}{5}$ $\frac{40}{100}$</p> <p>Now find one more example with shapes</p>	<p>use common factors to simplify fractions; use common multiples to express fractions in the same denomination</p> <p>Simplify fractions</p> <p>Children should be able to recognise that a fraction such as $\frac{5}{20}$ can be reduced to an equivalent fraction of $\frac{1}{4}$ by dividing both numerator and denominator by the same number [cancelling]</p> <p>They should be familiar with identifying fractions in different units. E.g. what fraction is 20 pence of two pounds? Of four pounds etc...</p>
	Compare & Order Fractions	<p>compare and order unit fractions, and fractions with the same denominator</p> <p>Compare fractions</p> <p>Order fractions</p> <p>Children should be able to answer questions like:</p> <p>Would you rather have $\frac{1}{3}$ of 30 sweets or $\frac{1}{5}$ of 40 sweets? Why?</p>	<p>compare and order fractions whose denominators are all multiples of the same number</p> <p>Compare and order (less than 1)</p> <p>Compare and order (more than 1)</p> <p>Children should be able to circle the two fractions that have the same value, or choose which one is the odd one out and justify their decision.</p> <p>$\frac{6}{10}, \frac{3}{5}, \frac{18}{20}, \frac{9}{15}$</p>	<p>compare and order fractions, including fractions >1</p> <p>Fractions on a number line</p> <p>Compare and order (denominator)</p> <p>Compare and order (numerator)</p> <p>Position fractions on a number line; e.g. mark fractions such as $\frac{7}{5}, \frac{11}{20}, \frac{18}{12}$ on a number line graduated in tenths</p> <p>What number is half way between $5\frac{1}{4}$ and $5\frac{1}{2}$?</p> <p>Which is larger, $\frac{1}{3}$ or $\frac{2}{5}$? Explain how you know.</p>

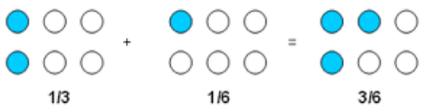

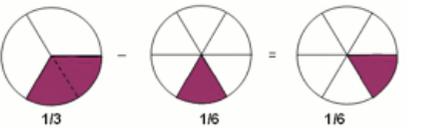

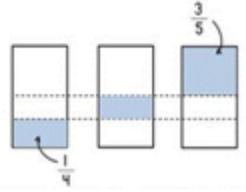

NUMBER: Fractions, Decimals and Percentages (NFD - 7 weeks)

Calculating with Fractions, Decimals and Percentages	Adding and Subtracting Fractions	<p>add/subtract fractions with the same denominator within one whole (e.g. $5/7 + 1/7 = 6/7$)</p> <p>Making the whole</p> <p>Add fractions</p> <p>Subtract fractions</p> <p>This could also be done by using drawings and in the array form:</p> <p>For addition:</p>  <p>and for subtraction:</p> 	<p>add and subtract fractions with the same denominator</p> <p>Add 2 or more fractions</p> <p>Subtract 2 fractions</p> <p>Subtract from whole amounts</p> <p>For example:</p> $\frac{1}{2} + \frac{1}{2} \quad \frac{1}{4} + \frac{3}{4} \quad \frac{3}{8} + \frac{5}{8} \quad \frac{3}{5} + \frac{4}{5} + \frac{1}{5}$ $\frac{6}{7} - \frac{4}{7} \quad \frac{9}{10} + \frac{4}{10} - \frac{3}{10}$	<p>add and subtract fractions with the same denominator and denominators that are multiples of the same number</p> <p>Add and subtract fractions</p> <p>Add fractions within 1</p> <p>Add 3 or more fractions within 1</p> <p>Add fractions (beyond 1)</p> <p>Add mixed numbers</p> <p>Subtract fractions</p> <p>Subtract mixed numbers (1)</p> <p>Subtract mixed numbers (2)</p> <p>Subtract 2 mixed numbers</p>	<p>add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions</p> <p>Add and subtract fractions (1)</p> <p>Add and subtract fractions (2)</p> <p>Adding fractions</p> <p>Subtracting fractions</p> <p>Mixed adding subtraction problems</p> <p>Here are three identical rectangles. A fraction of each has been shaded.</p>  <p>What fraction of the middle rectangle has been shaded?</p> <p>A chocolate bar has 15 pieces. William eats 3 pieces and Amber eats 2 pieces. What fraction of the chocolate bar remains?</p>
	Multiplying and Dividing Fractions	<p>multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams</p> <p>Multiply by an integer (1)</p> <p>Multiply by an integer (2)</p> <p>Multiply by an integer (3)</p> <p>What is $\frac{3}{10}$ of 50, 20, 100...?</p> <p>What is $\frac{4}{5}$ of 50, 35, 100....?</p>	<p>multiply simple pairs of proper fractions, writing the answer in its simplest form, (e.g. $\frac{1}{4} \times \frac{1}{2} = \frac{1}{8}$)</p> <p>Multiply fractions by an integer</p> <p>Multiply fractions by fraction</p> <p>Recognise that $\frac{1}{4}$ of 12, $\frac{1}{4} \times 12$ and 12 divided by 4 are equivalent</p> <p>Use cancellation to simplify the product of a fraction and an integer</p> <p>Eg if $\frac{1}{5} \times 15 = 3$ then $\frac{2}{5} \times 15 = 2 \times \frac{1}{5} \times 15 = 2 \times 3 = 6$</p> <p>Work out how many $\frac{1}{2}$s in 15, how many $\frac{2}{5}$s in 15, how many $\frac{2}{5}$s in 1 etc.</p> <p>divide proper fractions by whole numbers (e.g. $\frac{1}{3} \div 2 = \frac{1}{6}$)</p> <p>Divide fractions by integer (1)</p> <p>Divide fractions by integer (2)</p> <p>Would prefer to share $\frac{1}{2}$ of a pizza with 2 people or $\frac{1}{4}$ of a pizza with 4 people? Why?</p>		

NUMBER: Fractions, Decimals and Percentages (NFD - 7 weeks)

Calculating with Fractions, Decimals and Percentages	Calculating with Percentages		<p>recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred'</p> <p>Understanding percentages</p> <p>30% of 60 is <input type="checkbox"/></p> <p>30% of <input type="checkbox"/> is 60</p>	<p>solve problems involving the calculation of percentages (e.g. of measures) such as 15% of 360 and the use of percentages for comparison</p> <p>Percentage of an amount (1)</p> <p>Percentage of an amount (2)</p> <p>Percentage – missing values</p> <p>Percentage increase and decrease</p> <p>A class contains 12 boys and 18 girls. What percentage of the class are girls? What percentage are boys?</p> <p>25% of the apples in a basket are red. The rest are green. There are 21 red apples. How many green apples are there?</p>
	NCETM Reasoning	<p>What do you notice?</p> <p>$1/10 + 9/10 = 1$</p> <p>$2/10 + 8/10 = 1$</p> <p>$3/10 + 7/10 = 1$</p> <p>Continue the pattern</p> <p>Can you make up a similar pattern for eighths?</p> <p>The answer is $5/10$, what is the question? (involving fractions / operations)</p>	<p>What do you notice?</p> <p>$5/5 - 1/5 = 4/5$</p> <p>$4/5 - 1/5 = 3/5$</p> <p>Continue the pattern</p> <p>Can you make up a similar pattern for addition?</p> <p>The answer is $3/5$, what is the question?</p> <p>What do you notice?</p> <p>$11/100 + 89/100 = 1$</p> <p>$12/100 + 88/100 = 1$</p> <p>$13/100 + 87/100 = 1$</p> <p>Continue the pattern for the next five number sentences</p>	<p>What do you notice?</p> <p>$3/4$ and $1/4 = 4/4 = 1$</p> <p>$4/4$ and $1/4 = 5/4 = 1 \frac{1}{4}$</p> <p>$5/4$ and $1/4 = 6/4 = 1 \frac{1}{2}$</p> <p>Continue the pattern up to the total of 2.</p> <p>Can you make up a similar pattern for subtraction?</p> <p>The answer is $1 \frac{2}{5}$, what is the question</p> <p>Continue the pattern</p> <p>$1/4 \times 3 =$</p> <p>$1/4 \times 4 =$</p> <p>$1/4 \times 5 =$</p> <p>Continue the pattern for five more number sentences. How many steps will it take to get to 3?</p> <p>$5/3$ of 24 = 40</p> <p>Write a similar sentence where the answer is 56.</p> <p>The answer is $2 \frac{1}{4}$, what is the question</p> <p>Give your top tips for multiplying fractions. Which is more:</p> <p>20% of 200 or 25% of 180?</p> <p>Explain your reasoning.</p>

NUMBER: Fractions, Decimals and Percentages (NFD - 7 weeks)

<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Solving Problems</p>	<p>solve problems that involve all of the above</p>	<p>solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number</p>	<p>solve problems involving numbers with up to three decimal places</p>	<p>solve problems which require answers to be rounded to specified degrees of accuracy</p>	
	<p>Children should be able to answer questions like</p> <ul style="list-style-type: none"> 15 grapes are shared equally onto five plates. What fraction of the grapes is on each plate? <p>Megan has 20 animal stickers to go on this page –</p>  <p>1/4 of them are dog stickers 1/2 of them are cat stickers The rest are rabbit stickers</p> <p>How many rabbit stickers does she have?</p> <p>Only a fraction of each ribbon is shown. The rest is hidden behind the sheet of paper –</p> <p>First: </p> <p>Second: </p>  <p>Which ribbon is longer? Explain your reasoning.</p>	<p>What is one-fifth of twenty-five?</p> <p>Write the missing number to make this correct.</p> $\frac{1}{4} \text{ of } 24 = \frac{1}{2} \text{ of } \square$  <p>Match each box to the correct number.</p> <div style="display: flex; justify-content: space-around;"> <div style="border: 1px solid black; padding: 2px;">$\frac{1}{2}$ of 30</div> <div style="border: 1px solid black; padding: 2px;">$\frac{1}{3}$ of 75</div> <div style="border: 1px solid black; padding: 2px;">$\frac{1}{5}$ of 150</div> </div>	$\begin{array}{r} 72.8 \\ + 54.6 \\ \hline 127.4 \\ 1 \end{array}$ <p>8 tenths add 6 tenths makes 14 tenths, or 1 whole and 4 tenths. The 1 whole is 'carried' into the units column and the 4 tenths is written in the tenths column.</p> <p>solve problems which require knowing percentage and decimal equivalents of 1/2, 1/4, 1/5, 2/5, 4/5 and those fractions with a denominator of a multiple of 10 or 25</p>	<p>Children should be able to solve problems such as –</p> <ul style="list-style-type: none"> Four friends win £48,623. The money is to be shared equally between them – how much will each person receive? 107 pupils and teachers need to be taken to the theatre. How many 15-seater minibuses will be required? How many boxes of 60 nails can be filled from 340 nails? <p>solve problems involving unequal sharing and grouping using knowledge of fractions and multiples</p> <p>Four rules with fractions</p> <p>Using ratio language</p> <p>Ratio and fractions</p> <p>Children solve problems involving unequal quantities, for example, 'for every egg you need 3 spoons of flour'. Relate fractions to multiplication and division (e.g. $6 \div 2 = \frac{1}{2}$ of $6 = 6 \times \frac{1}{2}$), simplify fractions by cancelling common factors, find fractions of whole-number quantities and solve problems such as:</p> <ul style="list-style-type: none"> What fraction is 18 of 12 What fraction is 500ml of 400ml? What is $\frac{14}{35}$ in its simplest form? What is two thirds of 66? What is three quarters of 500? <p>A gardener plants tulip bulbs in a flower bed. For every 3 red bulbs, she plants 4 white bulbs.</p> <p>If she plants 60 white bulbs, how many red bulbs does she need?</p> 	
	<div style="display: flex; justify-content: space-around;"> <div style="border: 1px solid black; border-radius: 10px; padding: 2px 10px;">1</div> <div style="border: 1px solid black; border-radius: 10px; padding: 2px 10px;">2</div> <div style="border: 1px solid black; border-radius: 10px; padding: 2px 10px;">3</div> </div>	<div style="border: 1px solid black; border-radius: 10px; padding: 2px 10px;">1</div>			
<p>solve problems that involve all of the above</p>		<p>solve problems involving numbers with up to three decimal places</p>		<p>solve problems which require answers to be rounded to specified degrees of accuracy</p>
